

Global Aim Improve child development	Primary Drivers	Secondary Drivers	Change Strategies
<p style="text-align: center;">FY21 SMART AIM</p> <p>1. By January 2022, across all KS MIECHV LIAs, we will increase the percentage of ASQ-3 screeners conducted within the prescribed window of time from 73% to 83%.</p> <p>ASQ completion windows</p> <ul style="list-style-type: none"> 9-month screener: 9 months 0 days through 9 months 30 days 18-month screener: 17 months 0 days through 18 months 30 days 24-month screener: 23 months 0 days through 25 months 15 days 	1. Effective systems for screening	Scheduling and planning of home visits to ensure ASQ completion Consistent screening and documentation Timely, specific and sensitive communication of results to families	1. Protocol for screening and tracking (tools, timing, referrals, follow-up) 2. Effective tracking system 3. Regular training for HVs on policy and protocols, practice, and tools 4. Parent views/concerns about child’s development addressed at each home visit
	2. Reliable and effective systems for referrals and follow-ups	Complete screening, referral, and feedback loop Strong relationships and care coordination with community partners	5. Protocols or decision trees for positive screen, referral, and follow-up 6. Use of DAISEY scheduling report into home visit planning (including planning for newly enrolled families) 7. Increased collaboration with community services
	3. Support for home visitors to address developmental needs	Timely and effective supervisory support HVs with knowledge and competency to screen, share results, guide families, refer, and follow-up Use of data to improve practices	8. Reflective supervision and supervisory support for HVs 9. Training & education of HVs in early childhood development, systems, and best practices 10. Monthly data review including review of DAISEY scheduling report
	4. Engagement of families in promotion of healthy development	Families’ direct impact on developmental support is maximized HV engages family-led conversation around development at home visits Referrals and linkages HVs recommend are acceptable to family	11. Reduction in client barriers to services 12. Guidance and education for families about developmental-based screening including use of KS HV Developmental Screening Passport 13. HVs seek feedback from parents on use of referral services
